

Collective Dashboard

An online platform that helps organizations find and learn about community partners, share information about their maternal and child health services with local organizations and families, and access resources for working together.

The Collective dashboard includes...

Community

Learn about the wide range of programs and services in your community so you can make appropriate referrals and help families get the support they need. Grow your network by adding organizations to your list of partners. You can even explore organizations in bordering states!¹

Organization Profiles

Share your organization's services, locations, and hours of operation. Let local partners know how to contact and make referrals to your programs. Your organization profile will also be visible on the [Resource Platform](#) to families searching for local maternal and child health services.

Resources

Search for resources and see how they have been used in other communities. Available resources include sample referral forms, community needs assessments, family education handouts and videos, toolkits, and MUCH more!

Lessons Learned

Learn from the successes and challenges of other communities. Access resources they used and adapt them to your needs. Lessons learned cover topics such as increasing referrals, expanding doula access, building community coalitions, and more.

How to Access the Dashboard

[Sign up](#) for a Collective account to get access to the Collective dashboard. Use these step-by-step instructions for guidance on [how to sign up for a Collective account](#).

¹ The new "Community" section is replacing "Community Match."
